

LOVE IN ACTION

Your impact in Christ-centred classrooms around the world

Sena is Going to School (Thanks to You!)

When Sena Jobiro was born, her father was already gone. He passed away while her mother was still pregnant, leaving her to raise five children alone. Hunger and hardship shaped Sena's earliest memories. Many days, there was simply not enough food.

Continued on page 2

Continued...

By the age of three, Sena stood by the roadside near her home, stretching out her small hands to passing strangers. She begged not for herself alone, but to help her mother survive. Even in extreme poverty, Sena showed courage beyond her years.

Her mother, though uneducated and struggling, saw something special in her daughter. She believed Sena belonged in a classroom, not on the street. Desperate for help, she first turned to the local government, but no support came. With nowhere else to go, she approached Asegore Emmanuel School and shared Sena's story.

Through the vulnerable children fund made possible by donors like you, everything changed. Sena's tuition was covered, along with her uniform, school bag, stationery, and daily school needs. For the first time, she could learn with dignity. Not only did you unlock a quality education for Sena, but you also participate in a gospel witness to Sena and her whole family.

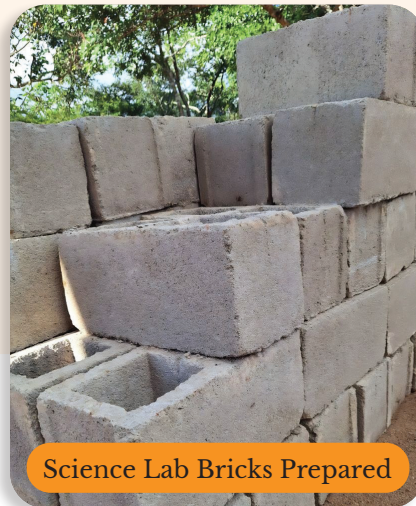

Today, Sena is a joyful Grade 2 student—bright, hopeful, and eager to learn. Her story is living proof that generosity transforms lives.

Thank you, for giving Sena (and countless children across Ethiopia) a seat in the classroom.

Your Bricks are Being Laid at the Kapoka Science Lab →

In response to our spring appeal, your generosity means progress is already being made on the Kapoka Secondary School science lab. As you send in your “bricks”, the local community in Malawi is busy molding their own. We are thrilled to celebrate with the community that the foundations are now officially laid.

It's not too late to send us your brick. Learn more at edudeo.com/give/build-lab

Science Lab Bricks Prepared

Science Lab Foundation

MY MESSAGE FOR THE STUDENTS

Greetings from us here in cold Canada. We are excited with you to look forward to a new building for the science lab. Garry is a bricklayer, so he knows all about bricks! All the best and we pray that you soon have the room and resources to experiment lots of science project.
Garry + Jeannette

Your words will be shared as part of this project.

Returned Brick

Your Support is Empowering Women Through Sewing

In a bright new space, 30 women and junior high girls sat at sewing machines for the first time. Though some were shy, their excitement was unmistakable as they began a journey toward opportunities previously unavailable in their community. This was the opening celebration of the Matochos vocational sewing program — made possible by the generous support of donors like you.

In many rural Guatemalan villages, fathers go abroad to find work, often leaving families behind without lasting support. Mothers are forced to struggle, boys leave school to work, and girls are often married young. This sewing program offers a powerful alternative. **By learning a professional skill locally, women can support their families without leaving home or sacrificing their children's education.**

“Now that they have the opportunity to take a sewing class in this place, it will be a great blessing” shared Maria-Flores the program director. “Since there are very few job opportunities, I believe that if the girls learn, it will open doors for them in the future.”

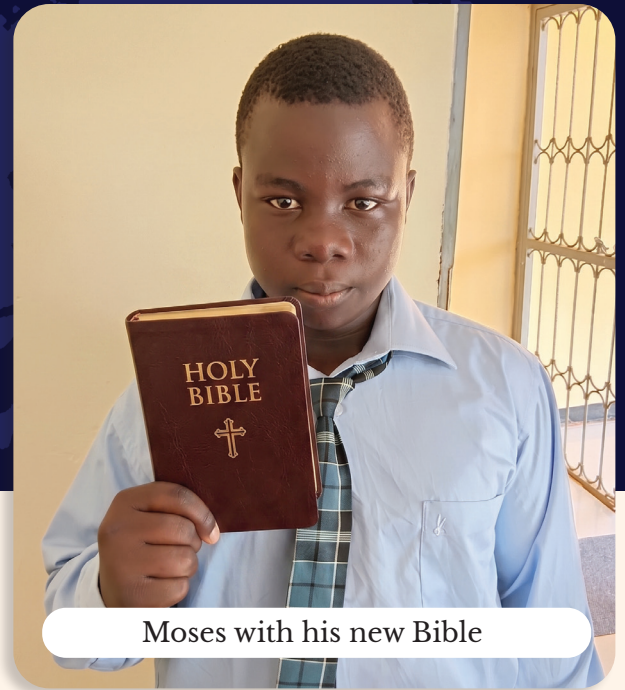

Students explore new sewing room

Maria-Flores overcame some similar hardships to lead this program. Following a proven model, the program will grow into a sewing cooperative, creating sustainable income and shared skill-building.

An exciting development for the community was the unexpected interest shown by local boys during the program opening. This is a hopeful challenge to “machismo” values. At its heart, this initiative reflects dignity, faith, and possibility empowering students to shape a stronger future for themselves and their community.

Give today — and help **twice (x2!)** as many students →

Moses with his new Bible

Moses Sinyangwe, a student at Mphamba Secondary Day School in Zambia, recently held something in his hands he had never owned before: a Bible. Although Moses grew up learning about God, his family simply could not afford a copy of their own. That single gift brought a newfound peace and confidence to his classroom, and today, God's Word is actively shaping his heart—teaching him the beauty of generosity and inspiring him to look for ways to help those around him.

In Ethiopia, four-year-old Hana, from a Muslim family faced extreme hardship. Hana's grandmother took care of her but had difficulty affording the food, let alone school. But thanks to your support of the vulnerable students' fund, a local Christ-centred school opened its doors. Today, Hana is in kindergarten, equipped with the books and uniform she needs to thrive. What a beautiful way to live out the Gospel!

The impact of your gift starts with children like Moses and Hana, but it doesn't stop there. This is the exponential math of the Kingdom: research shows for every year these students stay in school, their ability to support their future

families increases by 8%. Because they are receiving an education today, their own children will have the opportunity to go to school tomorrow, breaking the cycle of poverty for generations to come.

A single gift multiplies. It becomes a bursary, which becomes a seat in a classroom, which eventually becomes a way to share the Good News that transforms entire families and communities.

Right now, your generosity has a unique opportunity to go even further. Thanks to a generous donor, from May 25 to July 1, every gift given to EduDeo is being matched dollar-for-dollar, up to \$15,000. When you give today, your donation is instantly doubled.
